REF: Rate Increase

To Whom It May Concern,

Due to rate increases from two of four water sources, Westbound's Board of Directors, along with the Executive Director, deem it necessary to raise the rates.

Since Westbound's increase back in 2022, the Eastland source has increased their rates by 53% and the Cisco source has increased by 69%.

The increase for Westbound's customers will be a 22% increase to absorb the increased costs.

We strive to keep costs down for our customers, and as such, we are ONLY increasing the price of the water. The monthly minimum of \$40.43 will NOT be increased at this time.

To be fully transparent of our rates and charges, please see the back to view the rate and charges list for the updated fees, which will go into effect November 1, 2025.

Our average customer uses about 4000 gallons per month. The increase on our average bill will be about \$11 a month.

Thank You

Westbound WSC
